FOREWORD

The American University's Courts Technical Assistance Program is the central activity of the School of Public Affairs' Justice Programs Office. It provides short-term consultant services to state and local courts and related criminal justice agencies throughout the United States on all aspects of judicial system organization, management, case processing, judicial and court personnel training, inter-agency relationships, technology applications, and specialized caseflow management issues. Technical assistance services are provided primarily by practitioner-experts and American University faculty. This Courts Technical Assistance Program bibliography includes publications produced in conjunction with national technical assistance projects sponsored by the U.S. Department of Justice and the State Justice Institute, and reports of studies conducted under direct contract with state and local governments.

The reports and special studies listed in this publication represent the work-product of the Courts Technical Assistance Program and related projects since 1986.

Joseph A. Trotter, Jr.
Director
Justice Programs Office
